

Slotervaart Medical Centre Amsterdam

Brief: Design & Construction of a modular car park.

Client: Stichting Medisch Centrum Slotervaart

Contract Value: 6,251,650 euros

Construction Period: March 2014 - December 2014

Configuration: Circa 1,196 parking bays. (GF + 6)

Design and construction of a modular car park at the Medical Centre Slotervaart site in Amsterdam for the Antoni van Leeuwenhoek oncological hospital, Slotervaart Medical Centre and Sanquin blood bank. The multi-storey car park is constructed as a steel structure with prefab concrete TT floor slabs. The facade is clad in bamboo poles.

The car park was designed in a way so as to facilitate future extension, proposing a possibility of extending the car park by up to 6 more grid lines, creating a total capacity of at least 2,420 parking spaces.
