

Maidstone Hospital

Brief: To design and construct a new deck car park structure over an existing surface car park.

Client: Tunbridge Wells & Maidstone NHS Trust

Contract Value: Confidential

Construction Period: 8 weeks construction of sub-structure, steel frame and concrete planks. M&E additional.

Configuration: Circa 410 parking bays. (GF +1)

Working closely with the client, Ballast Nedam Parking offered a turnkey solution from RIBA Stage 01 to Stage 06. All planning and building regulations related items were completed in-house saving the client significant additional costs.

The project was delivered with a keen eye on both price and programme, working to a clear brief to supply a robust and user-friendly solution that

requires minimal ongoing maintenance.

During the later stages of construction, the Covid 19 outbreak threatened to hamper progress, but our adapted safe systems of working and outstanding site team ensured both programme and budget were maintained.
